

Ski and Green

Can you ski and be green ?

The start of the problem !

Solutions

- - being self-sufficient in electricity(wind turbine, solar panels...)
- - water recycling (hotels and the artificial snow)
- - Transports (bus, train..)

- Green electricity:

- They destroy the landscape (big wind turbines, dams)
- big investment of money but with a payback

- Water recycling:

Recovery of rain water

Easily built and quite effective

Transports

A lot of people travels a huge distance

Advirtisement needed and people will still take their car

Investments of money and a good organisation are needed

• Conclusion:

You can ski and be green !

- Solution exists
- Those problems can be easily solved if we focus on them
- More people need to be concerned with those problems
